🏢 Work Experience

Senior Software Engineer - BKV Corpora

- Designed and developed machine le
  optimization of artificial lift systems.
- Developed AI-powered applications
  language models for event detectio
  gas well operations.
- Built web applications for real-time v
  and processing of gas wells data, to
  interpretation and decision-making
  managers.
- Significantly enhanced the efficiency
  processing algorithms, achieving ov
  performance. This set of optimizatio
  increase in the usage of related appl
- Developed templates and libraries, s
  of creating new applications and reu
  components.
- Architected and implemented AWS I
  Development of robust libraries and
  deployment of infrastructure into AW
  infrastructure as code techniques wi
- Technologies: Python, Javascript, Fas
  Plotly, Redux, Postgres SQL, AWS Clo
  Nodejs, HTML/CSS. Testing: Cypress,
  (backend).
